Chapter 7: Neutron Slowing Down Part II

much, so this model corresponds to a mixture of hydrogen and an absorbing element of "infinite" mass, which therefore does not slow neutrons down In this case, the slowing-down equation becomes: $[\dots] f(\dots)$ We introduce again the collision density, which we decompose as the sum of an uncollided component and a collided

Semi-Infinite Programming for Trajectory Optimization with ...

handles collision constraints with complex, non-convex 3D geometries The optimization problem is cast as a semi-infinite program in which each collision constraint is implicitly treated as an infinite number of numeric constraints The approach progressively generates some of these constraints for inclusion in a finite nonlinear program Constraint gen-
