### **Electrical Power Transmission Systems**

The electrical power is transmitted over a transmission line with a speed of light that is  $3 \times 10^8$  m/sec  
 Frequency of the power is 50Hz  
 The wave length of the voltage and current of the power can be determined by the equation given below,  $f\lambda = v$  where  $f$  is power frequency,  $\lambda$  is wave length and  $v$  is the speed of light
