### **GCSE Mathematics 2015 - Pearson qualifications**

6 use positive integer powers and associated real roots (square, cube and higher), recognise powers of 2, 3, 4, 5; estimate powers and roots of any given positive number 7 calculate with roots, and with integer and fractional indices 8 calculate exactly with fractions, surds and multiples of  $\pi$ ; simplify surd

### **GCSE (9-1) Mathematics - Pearson qualifications**

Use brackets and the hierarchy of operations up to and including with powers and roots inside the brackets, or raising brackets to powers or taking roots of brackets Pearson Edexcel Level 1/Level 2 GCSE (9-1) in Mathematics

### **Exponential and Logarithmic Functions - Pearson**

SECTION 61 ~ Composite Functions 405 (b)  $1g \sim f$   $21x^2 = g1 f1x^2 = g1x^2 + 3x - 12 = 21x^2 + 3x - 12 + 3 = 2x^2 + 6x - 2 + 3 = 2x^2 + 6x + 1$  Because the domains of both  $f$  and  $g$  are the set of all real numbers, the domain of  $g \sim f$  is the set of all real numbers Example 2 illustrates that, in general,  $f \sim g \circ g \sim f$  Sometimes  $f \sim g$  does equal  $g \sim f$ , as we shall see in Example 5
