SAMPLING TECHNIQUES INTRODUCTION

(3) Selects the sample, [Salant, p58] and decide on a sampling technique, and; (4) Makes an inference about the population [Raj, p4] All these four steps are interwoven and cannot be considered isolated from one another Simple random sampling, systematic sampling, stratified sampling fall into the category of simple sampling techniques

Determining Sample Size Page 2 - Tarleton State University

the sampling distribution shown in Figure 1 2 The use of the level of maximum variability ($P=5$) in the calculation of the sample size for the proportion generally will produce a more conservative sample size (ie, a larger one) than will be calculated by the sample size of the mean
